EDUCATION

Columbia University

B.S. in Computer Science

- **GPA:** 3.97/4.00 | **SAT:** 1550

- **Relevant Courses:** Multivariable Calculus, Program Design and Data Structures, Discrete Structures, Algorithms

Singapore International School (Hong Kong)

- **IB:** 43/45

New York City, NY

Jun. 2025 – Jun. 2028

Hong Kong, China

EXPERIENCE

Zoomob

Full-Stack Developer – Internship

- Led full-stack development of TaleCrafterAI, a scalable AI **SaaS** app for storywriters. Delivered **10+ responsive webpages** and **30+ reusable components**, while implementing robust backend infrastructure for performance and scalability.
- Architected **B2C** tech stack with integration of **5+ third party APIs** (**Google OAuth**, **Stripe Checkout**, **OpenRouter**, etc.) to streamline authentication, payment processing, and **RAG-based AI chat systems** to enhance contextual accuracy, personalization, and overall user engagement.

Hong Kong, China

May – July 2025

Vanderbilt University

Undergraduate Researcher

- Collaborated alongside Dr Jules White from Vanderbilt University to research applications of **Large Language Models** (LLMs), focusing on human–AI interaction and practical campus use cases.
- **Evaluated model performance** across 5+ LLMs models (Claude, GPT, Nova), documenting accuracy, usability, and scalability findings to contribute to ongoing campus AI initiatives.
- **Delivered 10+ prompt engineering iterations** for the end product chatbot assistant (course scheduler and tutor), enhancing accuracy, consistency, and contextual awareness in responses.

Nashville, TN

Jan. 2025 – May 2025

PROJECTS

3D Room Portfolio – A unique portfolio experience

Blender, ThreeJS, GSAP, Vite, CSS, Javascript

Github | https://github.com/Tobbs2005/3D_Portfolio

Website | <https://ziyuefang.dev>

- Developed an interactive 3D portfolio experience from scratch using **Blender** and **Three.js**, including full **3D modeling**, **UV mapping**, **texture baking**, and asset optimization with **GLTF** and **DRACO compression**.
- Implemented **raycasting** and **GSAP animations** for real-time rendering, smooth interactions, and responsive performance in a fully navigable virtual room showcasing personal projects.

MovieMatch – Tinder for movies

NextJS, React, TailwindCSS, Transformers, NLP, Vector Embeddings, Hugging Face Spaces

Github | <https://github.com/Tobbs2005/MovieMatch>

Website | <https://movie-match-ten-zeta.vercel.app/>

- Tinder-style movie recommender web app using **machine learning**, **SBERT vector embeddings**, and **cosine similarity** to dynamically match users with films based on preferences.
- Engineered an interactive **swipe interface** for like/dislike input, updating user taste vectors in real time and filtering results using **genre**, **metadata**, and **collaborative filtering** techniques.

SKILLS & LANGUAGES

Technical Skills: Java, Python, C++, HTML, CSS, Javascript, Typescript, React, SQL

Languages: English (Native), Mandarin (Proficient), Cantonese (Intermediate)
